**LSO Working Papers
in Linguistics
Volume 7**

Proceedings of WIGL 2007

Department of Linguistics
University of Wisconsin-Madison

The fifth Workshop in General Linguistics (WIGL) took place at the University of Wisconsin-Madison March 2-3, 2007. The workshop was organized by Blake Rodgers, with help from a substantial crew of UW undergrad and grad student volunteers. This year we had a great lineup of speakers from across the country, and were fortunate to hear a talk by invited speaker Mürvet Eñç. Thanks to all the participants for their contributions and for making WIGL 5 such a success!

The following papers were presented at the workshop but are not included in this volume: Mürvet Eñç “Event structure, boundaries, and temporal modifiers,” Iljoo Ha “Pseudo noun incorporation in Korean verbal possessive constructions.”

Beginning with Volume 4, the *LSO Working Papers in Linguistics* are available online. Visit our webpage to download papers for free, or to access an order form for earlier print volumes:
